Built-in protections against malware, spam, and ransomware

Drive can provide encrypted and secure access to your files. Files shared with you can be proactively scanned and removed when malware, spam, ransomware, or phishing is detected. And Drive is cloud-native, which eliminates the need for local files and can minimize risk to your devices.

People-first collaboration apps to supercharge teamwork

Drive integrates with [Docs](#), [Sheets](#), and [Slides](#), cloud-native collaboration apps that enable your team to create content and collaborate more effectively in real time.

Integration with the tools and apps your team is already using

Drive integrates with and complements your team's existing technology. Collaborate in Microsoft Office files without the need to convert file formats, and edit and store over 100 additional file types, including PDFs, CAD files, images, and more.

Google's Search and AI technology helps your team move faster

Google's powerful search capabilities are embedded in Drive and offer speed, reliability, and collaboration. And features like Drive search chips help your team find files fast by quickly surfacing more relevant results.

Inclusive products and features

Ways to find and support inclusive spaces on Google Maps and Search

Improved camera technology that accurately photographs diverse skin tones

An Android tool that enables people with communication difficulties to connect in real time

“With product inclusion, it’s really looking end to end at the design and development process and saying: Who else needs to be in the room? Who else do we need to have perspective from? And I think co-creating is really integral to building a product that actually suits the world.”

ANNIE-JEAN BAPTISTE (SHE/HER)
HEAD OF PRODUCT INCLUSION & EQUITY, GOOGLE

All your devices, working together

Now you can easily connect your Android phone to your tablet, watch, car, TV, and more
